This press release contains "forward-looking statements" within the meaning of the provisions of the U.S. Private Securities Litigation Reform Act of 1995. Such forward-looking statements are not guarantees of future performance. Actual results may differ materially from the forward-looking statements as a result of a number of risks and uncertainties, many of which are outside our control, including but not limited to: the risk of suffering reduced profits or losses as a result of intense competition, the risk that changes in energy prices and taxes may reduce Veolia Environnement's profits, the risk that governmental authorities could terminate or modify some of Veolia Environnement's contracts, the risk that acquisitions may not provide the benefits that Veolia Environnement hopes to achieve, the risks related to customary provisions of divestiture transactions, the risk that Veolia Environnement's compliance with environmental laws may become more costly in the future, the risk that currency exchange rate fluctuations may negatively affect Veolia Environnement's financial results and the price of its shares, the risk that Veolia Environnement may incur environmental liability in connection with its past, present and future operations, as well as the other risks described in the documents Veolia Environnement has filed with the Autorité des Marchés Financiers (French securities regulator). Veolia Environnement does not undertake, nor does it have, any obligation to provide updates or to revise any forward-looking statements. Investors and security holders may obtain from Veolia Environnement a free copy of documents it filed (www.veolia.com) with the Autorités des marchés financiers.

This document contains "non-GAAP financial measures". These "non-GAAP financial measures" might be defined differently from similar financial measures made public by other groups and should not replace GAAP financial measures prepared pursuant to IFRS standards.
