MESSAGE FROM THE CHIEF EXECUTIVE OFFICER

Estelle Brachlianoff, Chief Executive Officer of the Group, commented:

"Veolia's first quarter performance demonstrates the solidity of the Group's growth profile and confirms its excellent development outlook. We have built a model whose resilience is structurally anchored in our fundamentals. Focused on environmental security, Veolia addresses growing critical needs, and our business model makes us relatively insensitive to economic cycles or inflation.

With organic revenue growth of +2.1%⁽¹⁾ excluding energy prices and a remarkable increase in our EBITDA of +5.1%⁽¹⁾, we are showing our ability to perform and to maintain our operational discipline with €96 million in efficiency gains in the first quarter.

We are determinedly continuing to transform the Group profile towards international markets and technologies. Thus, in the first quarter, we continued to develop innovative offerings with the acquisition in PFAS decontamination in Australia, and have completed the main steps to successfully close the strategic acquisition of Clean Earth in the US by the end of June.

Innovation is at the heart of our strategy. We have announced an ambitious plan to accelerate our presence in the data center and microelectronics industries, aiming for more than one billion euros in annual revenue by 2030. At the same time, we are committed to doubling the share of operational efficiency gains from digital and artificial intelligence to reach 50% by 2030.

We confidently confirm our 2026 targets and the trajectory of our GreenUp plan. Together, we are building the environmental security of tomorrow."

⁽¹⁾ At constant scope and exchange rates

MAJOR EVENTS OF THE PERIOD

1 Major events of the period

1

1.1 BUSINESS AND INCOME TRENDS

A GOOD START TO THE YEAR COMBINING SOLID GROWTH AND GOOD PERFORMANCE

The Group posted resilient growth and solid EBITDA progression in the first quarter of 2026, driven by growing needs for essential services and ecological security despite an uncertain geopolitical environment.

This resilience is reflected in revenue growth of +2.1% excluding energy prices (at constant scope and exchange rates) reaching €11,427 million, and in improving profitability, with EBITDA up +5.1% at constant scope and exchange rates to reach €1,766 million thanks to operational levers that confirm the momentum of the GreenUp plan. The impact of the Middle East conflict remains limited, thanks to a differentiating and unique positioning combining operational discipline and a multilocal model.

Veolia continues the Group's transformation towards international operations and innovative services, to support growth and efficiency following GreenUp. The financial leverage is controlled at 2.92x, below the target of less than 3.0x excluding Clean Earth.

(€ million)	31 March 2025	31 March 2026	2026 / 2025	
			Δ at constant exchange rates	Δ at constant exchange rates & scope
Revenue	11,507	11,427	1.6 %	1.0 %
EBITDA ⁽¹⁾	1,695	1,766	6.2 %	5.1 %
Current EBIT ⁽¹⁾	915	971	8.1 %	7.2 %
Net Financial Debt ⁽¹⁾	-18,855	-20,797		

(1) The indicators are defined in Section 5.1 below.

Revenue as of March 31, 2026 stands at €11,427 million and varies by +2.1% at constant scope and exchange rates excluding energy prices. Revenue increased by +1.0% at constant scope and exchange rates, including growth in the Water (+2.0%) and Energy (+4.1%)⁽¹⁾ businesses and stable Waste activity (-0.1%). Geographically, the Group benefits from good international organic growth, which is distributed as follows across the Group's different segments:

- **Water Technologies (-2.2%):** the segment declined despite a good performance from the Products & Technologies and Services activities. Excluding Projects activity, the segment posted growth of +4.3% at constant scope and exchange rates;
- **Americas, Asia Pacific, Africa Middle-East (+3.1%):** in Water, North America increased by +4.6%, Morocco by +7.3% and Regulated Chile by +7.8%, as well as in the Waste activity which increased by +5.9% in Latin America, +3.9% in North America and remained stable in Asia Pacific. The Energy activity mainly concerns Asia Pacific, which recorded a decrease of -4.6%;
- **Europe (+0.8% and 3.0% excluding energy prices):** this growth is explained by good performances in the Water activity for Iberia (+5.7%) and in Central and Eastern Europe (+3.7%). The Waste activity is holding up in the region thanks to the good performance of Northern Europe (+2.9%). Regarding the Energy sector, growth was

2.1% in Central and Eastern Europe while Northern Europe declined by -3.1%;

- **France and Hazardous Waste Europe (+0.6%):** Water France grew slightly by +0.3% while the Recycling and Recovery activity declined by -1.1% due to commercial selectivity and falling electricity prices. Hazardous Waste Europe limited its decline to -1.5%, temporarily impacted by bad weather and exceptional technical shutdowns.

EBITDA as of March 31, 2026 stands at €1,766 million, up +5.1% at constant scope and exchange rates. This increase is driven by business growth and operational performance (+5.1%), favorable climate impact (+1.0%) mitigated by the variation in commodity prices (-0.9%).

Gross **operational efficiency gains** amount to €96 million.

Current EBIT stands at €971 million, up +7.2% at constant scope and exchange rates compared to March 31, 2025.

Net financial debt amounts to €20,797 million as of March 31, 2026, an increase of €1,942 million compared to March 31, 2025, mainly due to net financial investments made in the previous fiscal year from the second quarter of 2025 onwards, notably the acquisition of 30% of Water Technologies and Solutions from CDPQ by Veolia.

⁽¹⁾ Excluding energy prices

1.2 CHANGES IN GROUP STRUCTURE - STRATEGIC PROGRAM

1.2.1 Innovations and commercial developments

In 2026, Veolia continues the deployment of its GreenUp plan. The Group continues to innovate and strengthen its commercial footprint in geographical areas and in strategic businesses for the Group.

■ Major success in waste management in the UK

As of February 26, 2026, Veolia announced that it had won or renewed 11 contracts with UK local authorities in 2025, for a value exceeding £1 billion. These successes, which include long-term contracts with Bromley Council and several other local authorities, mean the Group now has over 50 public-sector partners in the country. In connection with the GreenUp program, these activities support decarbonization and the circular economy, in particular through the investment of £70 million in a PET recycling facility in Shropshire.

■ Strategic strengthening in the water sector in Mumbai

Veolia announced the signature of two operating and maintenance contracts (O&M) for 15 years for the drinking water production plants in Bhandup and Panjrapur in Mumbai. With a total capacity of 2.91 million m³ per day, these projects on an unprecedented scale covering more than 60% of the town's water needs by 2030.

■ Coal Phase-out in Karviná, Czech Republic

Veolia is transforming the Karviná power plant into a multi-energy facility (biomass, gas, solid recovered fuels) aiming for a complete coal phase-out by 2029. This project will reduce CO₂ emissions by 200,000 tonnes per year while supplying 50,000 households. This major initiative strengthens the "New Urban Energy" momentum to decarbonize district heating networks in Europe by 2030.

■ On April 14, 2026, Veolia launches a next-generation integrated offering to reinvent the future of data centers globally. The Group is accelerating in the data center and semiconductor markets and targets 1 billion euros per year by 2030 by planning:

- **Strong growth ambition:** Veolia is accelerating in these critical markets and targets 1 billion euros in annual revenue by 2030;
- **A response to resource pressure:** Demand is exploding and the combined water consumption of data centers and semiconductor manufacturing is expected to reach the equivalent of that of 46 million people by 2030. Faced with local resistance related to this overconsumption, Veolia positions itself as the partner for environmental security;
- **Launch of the "Data Center Resource 360" offering:** This new integrated solution, which is part of the GreenUp strategic plan and particularly targets the United States and Europe, aims to turn data centers into "circular hubs". The performance objectives are ambitious: up to 20% energy reuse (notably through waste heat recovery), 75% reduction in water footprint, up to 95% waste recycling and reuse;
- **Digital technology and AI as efficiency drivers:** Veolia relies on Hubgrade, its AI-powered digital platform, to monitor and optimize operations in real time. More broadly, the Group aims to double the share of its operational efficiency gains from AI and digital technology to reach 50% by 2030.

■ Launch of two new unprecedented dialogue forums with stakeholders at the heart of environmental security

Faced with new threats and growing challenges in environmental security, Veolia announced on April 23, 2026, on the sidelines of its Annual General Meeting, the creation of two dialogue and co-construction forums. The Stakeholder Assembly, an unprecedented working group, brings together 34 international figures - clients, financial partners, environmental organizations, employees and civil society representatives - to reflect, initially, on water security and the promises currently offered by water reuse.

The Future Generations Council, made up of 30 international stakeholders under thirty years of age, will meet twice a year with Estelle Brachlianoff, Chief Executive Officer of Veolia, and with the Executive Committee.

■ On April 27, 2026, Veolia announces its collaboration with Amazon to deploy wastewater reuse for data center cooling

This collaboration combines Veolia's advanced treated wastewater reuse technologies, as a global leader in water technologies, with Amazon's artificial intelligence and cloud capabilities, in order to develop more sustainable strategies for data centers.

It supports Amazon's goal of achieving a water positive footprint in its direct data center operations by 2030 and aligns with the objectives of Veolia's GreenUp strategic program in terms of resource preservation, pollution control and decarbonization.

This project is part of Veolia's new "Data Center Resource 360" offering, designed to optimize resource management for next-generation data centers.

1.2.2 Changes in Group structure

The main changes in scope as of March 31, 2026 were as follows:

■ Acquisition of a Hazardous Waste Treatment business in Australia

On February 20, 2026, the Group signed an agreement to acquire Enviropacific Services, an Australian Hazardous Waste Treatment company specializing in soil decontamination and contaminated water treatment. This transaction was finalized on March 31, 2026 for AU\$228 million (€137 million).

This acquisition follows the usual pattern of targeted acquisitions ("tuck-ins") and strengthens Veolia's pioneering position in the fight against PFAS contamination in Australia. This strategic operation contributes to the Group's ambition to achieve €1 billion in revenue from the treatment of PFAS and micropollutants by 2030.

1.2.3 Operations in progress

■ Acquisition of Clean Earth in the United States confirmed for the second quarter of 2026

Following the signing of the acquisition agreement on November 21, 2025 for Clean Earth, a major player in Hazardous Waste Treatment, the closing of the transaction is expected in the second quarter of 2026. Approval from U.S. antitrust authorities was obtained on March 3, and the notification to the SEC was filed by Enviri on March 20, 2026.

1.3 GROUP FINANCING

1.3.1 Group debt structure

Net financial debt is €20,797 million as of March 31, 2026.

Cash stands at €10,786 million as of March 31, 2026, after the repayment on February 9, 2026 of €850 million in deeply subordinated securities.

The Group also has at its disposal a multi-currency syndicated loan, with a total undrawn amount of €4,500 million as of March 31, 2026, as well as bilateral credit facilities with a total undrawn amount of €1,397 million as of March 31, 2026.

This enables it to benefit from a solid net liquidity position of €6,730 million as of March 31, 2026, after taking into account current debts (including bank overdrafts and other cash position items) in the amount of €9,953 million.

1.3.2 Bond debt management

On January 14, 2026, Veolia carried out a bond issue for a total amount of 2.5 billion euros in three tranches, respectively of €950 million at a rate of 3.209% maturing in January 2031, €900 million at a rate of 3.639% maturing in January 2034, and €650 million at a rate of 4.052% maturing in January 2038, respectively. The weighted average rate is 3.583%.

On April 10, Veolia proceeded with a second bond issuance in 2026 for an amount of one billion dollars in two tranches: 500 million euros at a rate of 3.69% maturing in April 2031 and 500 million euros at a rate of 4.122% maturing in April 2036. The weighted average rate is 3.906%.

1.3.3 Confirmation of the credit outlook

On April 27, 2026, Standard and Poor's confirmed Veolia Environnement's credit rating at A-2/BBB with a stable outlook. On December 2, 2025, Moody's confirmed the Group's rating at P-2/Baa1 with a stable outlook.

1.3.4 Dividend payment

The combined general meeting of shareholders on April 23, 2026 approved the payment of a dividend of 1.50 euros per share for the 2025 financial year, payable in cash. The 2025 dividends will be paid from May 13, 2026 for an amount of 1,097 million euros.

1.4 CHANGES IN GOVERNANCE

As part of the annual re-election of the Board, the Board of Directors' meeting of November 5, 2025 noted the expiration of the terms of office of three directors at the end of the General Meeting of April 23, 2026 (Mr. Antoine Frérot, Mrs. Estelle Brachlianoff and Mrs. Agata Mazurek-Bąk) and that Mrs. Agata Mazurek-Bąk as well as her replacement Mr. Romain Ascione did not seek the renewal of her term of office at the end of that General Meeting.

At the recommendation of the Nominations Committee, the Board of Directors decided to recommend the renewal by the Combined General Meeting of April 23, 2026 of the terms of office as director of Mr. Antoine Frérot and Mrs. Estelle Brachlianoff, and the appointment of Mr. Jean-Christophe Taret as director representing employee shareholders, and of Mrs. Sandra Cortese as a replacement, to replace Mrs. Agata Mazurek-Bąk and Mr. Romain Ascione respectively.

The Veolia Environnement Combined General Meeting of April 23, 2026:

- renewed the the terms of office of Mr. Antoine Frérot and Ms. Estelle Brachlianoff as director; and
- the appointment of Mr. Jean-Christophe Taret as director representing employee shareholders and Mrs. Sandra Cortese as a replacement;

for a four-year period expiring at the end of the General Meeting called to approve the financial statements for the year ending December 31, 2029.

The Board of Directors, following the recommendation of its Nominations Committee, renewed the mandate of Mr. Antoine Frérot as Chairman of the Board of Directors, it being specified that in 2028, he will reach the age limit set by the bylaws for chairing the Board of Directors. In 2026 and 2027, a review will be conducted by the Nominations Committee and by the Board of Directors regarding the succession of the Chairman of the Board of Directors. In addition, the Board of Directors confirmed Mrs. Estelle Brachlianoff as Chief Executive Officer.

At the date of this document, the Veolia Environnement Board of Directors had fifteen directors, 75% of whom were independent directors (excluding the two directors representing employees and the director representing employee shareholders), 46%⁽¹⁾ of whom were women, and one non-voting member (censeur):

- Mr. Antoine Frérot, Chairman of the Board of Directors;
- Mrs. Estelle Brachlianoff, Chief Executive Officer;
- Mr. Pierre-André de Chalendar*, Senior Independent Director;
- Mr. Olivier Andriès*;
- Mrs. Maryse Aulagnon;
- Mrs. Véronique Bédague*;
- Mr. Philippe Brassac*;
- Mr. Arnaud Caudoux*;
- Mrs. Isabelle Courville*;
- Mr. Franck Le Roux, Director representing employees;
- Mrs. Julia Marton-Lefèvre*;
- Mr. Pavel Páša, Director representing employees;
- Mrs. Elena Salgado*;
- Mr. Jean-Christophe Taret, Director representing employee shareholders;
- Mr. Guillaume Texier*;
- Mr. Enric Xavier Amiguet i Rovira, non-voting member (censeur).

* Independent member.

The composition of the Board Committees is:

- **Accounts and Audit Committee:** Mr. Guillaume Texier (Chairman), Mr. Olivier Andriès, M. Philippe Brassac, Mrs. Véronique Bédague, Mr. Arnaud Caudoux, et Mr. Franck Le Roux (Director representing employees);
- **Nominations Committee:** Mr. Pierre-André de Chalendar (Chairman), Mrs. Maryse Aulagnon, Mr. Philippe Brassac, Mrs. Isabelle Courville and Mr. Antoine Frérot;
- **Compensation Committee:** Mr. Olivier Andriès (Chairman), Mrs. Maryse Aulagnon, Mr. Pierre-André de Chalendar, Mr. Franck Le Roux (Director representing employees) and Mrs. Elena Salgado;
- **Research, Innovation and Sustainable Development Committee:** Mrs. Isabelle Courville (Chairwoman), Mr. Arnaud Caudoux, Mrs. Julia Marton-Lefèvre, Mr. Pavel Páša (Director representing employees), Mrs. Elena Salgado, M Jean Christophe Taret (Director representing employee shareholders) and Mr. Guillaume Texier. Mr. Enric Amiguet i Rovira is a permanent guest of this committee;
- **Purpose Committee:** Mr. Antoine Frérot (Chairman), Mr. Olivier Andriès, Mrs. Maryse Aulagnon, Mr. Philippe Brassac, Mr. Pierre-André de Chalendar, Mrs. Isabelle Courville, Mr. Franck Le Roux (Director representing employees) and Mr. Guillaume Texier.

The Chief Executive Officer is assisted in the performance of her duties by an Executive Committee, a discussion, consultation and general policy decision-making body which seeks to implement the Group's strategic direction. The Committee is also consulted on major issues concerning the Group's corporate life.

The Executive Committee meets monthly.

As of the date of this document, the Company's Executive Committee included six non-French nationalities and was composed as follows:

- Estelle Brachlianoff, Chief Executive Officer;
- Emmanuelle Menning, Deputy Chief Executive Officer in charge of Finance, and overseeing for Germany BU;
- Laurent Obadia, Deputy Chief Executive Officer in charge of Stakeholders and Communications and overseeing Africa Middle East;
- Geoffroy Carlier, Executive Vice President of Operational Integration and Complex Projects;
- Sébastien Daziano, Executive Vice President of Multifaceted Performance & Strategy;
- Gavin Graveson, CEO Asia-Pacific Zone;
- Philippe Guitard, CEO Central and Eastern Europe Zone;
- Éric Haza, Chief Legal Officer;
- Richard Kirkman, CEO Northern Europe Zone and Chief Growth Officer;
- Anne Le Guennec, CEO Water Technologies Zone;
- Christophe Maquet, Chief Business Performance Officer;
- Gustavo Miques, CEO Iberia and Latin America Zone;
- Jean-François Nogrette, CEO France and Special Waste Europe Zone;
- Helman le Pas de Sécheval, General Counsel and overseeing Italy BU;
- Nadège Petit, CEO North America Zone;
- Isabelle Quainon, Chief Human Resources Officer;

In addition, Management Committee meetings bring together, each quarter all the Group's functions and geographies to share and commit to the Group's challenges and outlook. At the date of this document, this Committee had 37 members, including the 16 Management Committee members; its composition can be viewed on Veolia's website (www.veolia.com).

⁽¹⁾ Excluding the two Directors representing employees in accordance with Articles L. 225-27-1 and L. 22-10-7 of the French Commercial Code.

2

ACCOUNTING AND FINANCIAL INFORMATION

2 Accounting and financial information

2.1 KEY FIGURES

Group key figures are presented in accordance with the definitions as described in the publication of the financial statements for the year ended December 31, 2025 (see Chapter 5.1 – Definitions).

(€ million)	March 31, 2025	March 31, 2026	2026 / 2025		
			Δ	Δ at constant exchange rates	Δ at constant scope & exchange rates
Revenue	11,507	11,427	-0.7%	1.6%	1.0%
EBITDA ⁽¹⁾	1,695	1,766	4.2%	6.2%	5.1%
Current EBIT ^{(2) (3)}	915	971	6.1%	8.1%	7.2%
Net industrial investments (including new operating financial assets)	-1,013	-860			
Net free cash-flow	-906	-762			
Net financial debt - Closing ⁽⁴⁾	-18,855	-20,797			

(1) The indicators are defined in Section 5.1.

(2) Including the share of current net income of joint ventures and associates.

(3) Re-presented for depreciation of revalued assets, identified during the Suez purchase price allocation, of €44 million as of March 31, 2025 and €40 million as of March 31, 2026 as defined in Section 5.1.

(4) Net financial debt excludes the remeasurement of financial liabilities during the Suez purchase price allocation as defined in Section 5.1 of the Universal Registration Document.

The main foreign exchange impacts between March 31, 2026 and March 31, 2025 are as follows:

FX impacts as of March 31, 2026 (vs March 31, 2025)	%	(€ million)
Revenue	-2.3%	-269
EBITDA	-2.0%	-33
Current EBIT	-2.0%	-18
Net financial debt ^{(1) (2)}	0.5%	-99

(1) Including fair value adjustment

(2) Vs December 31, 2025

2.2 GROUP GEOGRAPHIC PERFORMANCE

2.2.1 Revenues by operating segment

Group consolidated revenue amounted to €11,427 million as of March 31, 2026, compared to €11,507 million as of March 31, 2025. The increase was +1.0% at constant scope and exchange rates and +2.1% excluding energy prices, which mainly affects Europe.

(€ million)	March 31, 2025	March 31, 2026	Δ	2026/2025	
				Δ at constant exchange rates	Δ at constant scope and exchange rates
Water technologies	1,156	1,061	-8.3%	-2.2%	-2.2%
Americas, Asia Pacific, Africa Middle-East	2,845	2,799	-1.6%	5.3%	3.1%
Europe ⁽¹⁾	5,351	5,407	1.0%	1.1%	0.8%
France and Hazardous Waste Europe	2,153	2,160	0.3%	0.3%	0.6%
Other	2	1	0.0%	0.0%	0.0%
GROUP	11,507	11,427	-0.7%	1.6%	1.0%

As of March 31, 2026, revenue by operating segment breaks down as follows:

Revenue as of March 31, 2026: €11,427 million

Compared with March 31, 2025, revenue increase as of March 31, 2026 was +1.0% at constant scope and exchange rates.

The **Water Technologies** activity reported revenue of 1,061 million euros, down -2.2% at constant scope and exchange rates versus Q1 2025, due to Projects slowdown, notably in the Middle East, while Products & Technologies and Services performance remained strong. Excluding Projects, Water Technologies was thus up +4.3% on a like-for-like basis.

In the **Americas, Asia Pacific, Africa Middle-East**, revenue reached 2,799 million euros, an organic growth of +3.1%, increasing across most geographies:

- In **North America**, revenue reached 707 million euros, up +4.7% at constant scope and exchange rates, thanks to price increases in Regulated Water, Municipal Water and Hazardous Waste. The Hazardous Waste activity also benefited from strong commercial momentum despite the intensity of the adverse weather conditions during the period;
- **Latin America** revenue stood at 525 million euros in, up +7.6% on a like-for-like basis. This growth was driven by tariff indexations in Regulated Water in Chile and by a good progression of Waste activity in Brazil, Argentina and Colombia;
- In **Asia**, revenue amounted to 618 million euros, down -1.6% at constant scope and exchange rates. This decrease was mainly due to the slowdown in Waste activity in Hong-Kong. However this is partly compensated by several positive performances. Japan posted positive momentum in Municipal Water, with a good contract renewal rate. South-East Asia and India benefited from sustained volumes in plastic recycling and hazardous waste treatment. Finally, China revenue remained stable (+0.3% on a like-for-like basis), the strong growth in Waste activity offsetting volume decrease in Industrial Water;

- In the **Pacific** region, revenue amounted to 542 million euros, up +1.4% on a like-for-like basis. The activity was driven by the very strong performance of Waste treatment and recovery operations (with significant volume growth in landfills and transfer stations) and the Water business (volumes and contract renewals);
- In **Africa Middle-East**, revenue totaled 407 million euros, up +4.4% on a like-for-like basis, in a complex geopolitical context. This increase is supported in particular by the strong performance in Morocco of +7.4% on a like-for-like basis, while in the Middle-East, growth was +3.0% on a like-for-like basis.

Revenue in **Europe⁽¹⁾** reached 5 407 million euros on March 31, 2026, an organic variation of +0.8%. Excluding energy prices, revenue rose by +3.0%, driven by Water (+5.4%) and Energy, combined with the resilience of Waste:

- In **Central and Eastern Europe**, revenue stood at 3 357 million euros, up +0.4% and up +3.1% excluding energy prices (on a like-for-like basis). This performance was mainly driven by a very favorable climate effect in Energy, particularly in Poland, which enabled to offset the decrease in energy prices. Growth was also supported by the strong momentum in the Water business, which benefited from significant tariff indexations (notably in Romania, the Czech Republic, and Bulgaria), allowing to offset a downturn in activity in Germany, particularly in Solid Waste;
- In **Northern Europe**, revenue of 1,052 million euros rose by +2.5% on a like-for-like basis. In the United Kingdom, revenue increased by +3.8% at constant scope and forex, thanks to the price increase and commercial gains, particularly in Waste treatment activities;
- In **Iberia**, revenue stood at 711 million euros, up +3.2% on a like-for-like basis. Growth was driven by the strong performance of the Water, which benefited from a favorable revision of tariffs in Spain. The increase in volumes and works in the Energy business offset the decline in energy prices;
- **Italy** generated revenue of 286 million euros, down -5.5% on a like-for-like basis, notably following a decrease in energy prices.

Revenue in **France and Hazardous Waste Europe** amounted to 2 160 million euros, slightly up +0.6% on a like-for-like basis compared to March 31, 2025.

- **Water** revenue of 723 million euros was up +0.3% on a like-for-like basis, thanks to higher volumes (+1.1%);
- **Waste** revenue stood at 698 million euros. The decrease of -1.1% on a like-for-like basis is mainly due to lower landfill volumes, commercial selectivity, decrease in electricity revenue, partially offset by favorable tariff indexations;
- **Hazardous Waste Europe** revenue reached 587 million euros, down -0.4% on a like-for-like basis. This decrease was mainly due to bad weather at the beginning of 2026 and exceptional technical shutdowns.

⁽¹⁾ As a reminder, the IFRS 8 "Europe" segment corresponds historically to the IFRS 8 "Europe excluding France" segment. This new denomination has been used starting from the December 31, 2025 publication

2.3 GROUP PERFORMANCE BY BUSINESS LINE

2.3.1 Revenues by business line

Compared with March 31, 2025, revenue was up +1.0% at constant scope and exchange rates. Excluding energy prices, revenue increased by +2.1%. The change in revenue by business, at constant scope and exchange rates compared to 2025, is explained as follows:

(€ million)	March 31, 2025	March 31, 2026	2026/2025		
			Δ	Δ at constant exchange rates	Δ at constant scope and exchange rates
Municipal Water	2,999	3,010	0.4%	3.4%	3.6%
Water Technologies	1,156	1,061	-8.3%	-2.1%	-2.2%
Water	4,155	4,070	-2.0%	1.9%	2.0%
Solid Waste	2,791	2,729	-2.2%	-0.2%	-0.8%
Hazardous Waste	1,019	1,035	1.6%	5.2%	1.7%
Waste ⁽¹⁾	3,811	3,764	-1.2%	1.2%	-0.1%
District Heating & Cooling Networks	2,617	2,657	1.5%	1.4%	0.8%
Bioenergy, Flexibility & Energy Efficiency	924	935	1.2%	3.1%	2.2%
Energy ⁽¹⁾	3,541	3,592	1.5%	1.8%	1.2%
GROUP	11,507	11,427	-0.7%	1.6%	1.0%

⁽¹⁾ restated to reflect changes in the business and improve comparability across periods

Revenue for the period ended March 31, 2026 breaks down by business as follows:

Revenue as of March 31, 2026: €11,427 million

The main changes in revenue by business at constant scope and exchange rates compared with figures of March 31, 2025 break down as follows:

Water revenue

Water activities recorded growth of +2.0% at constant scope and exchange rates, mainly driven by tariff increases of +1.8%, as well as improved volumes.

Revenue from the **stronghold Municipal Water** rose by +3.6% on a like-for-like basis, with tariff increases in most geographies (particularly in Spain, Central and Eastern Europe, North America and Chile).

Revenue from **Water Technologies booster activities** was down -2.2% on a like-for-like basis. This activity was impacted by Projects slowdown, notably in the Middle-East. Excluding Projects, the activity was thus up +4.3% on a like-for-like basis.

Waste revenue

Revenue from the **Waste** business remained stable (-0.1 % on a like-for-like basis), thanks to favorable tariff revisions (+1.9%) offsetting decrease in paper and plastic prices (-0.6%), Commerce/Volume/Works effect (-0.8%) and negative impact from adverse weather.

Revenue from the **stronghold Solid Waste Management** was slightly down -0.8% on a like-for-like basis. This resulted from a combination of an unfavorable external context (bad weather and decrease in the prices of recyclable materials and energy) and commercial selectivity.

Revenue from the **Hazardous Waste treatment booster** rose by +1.7% on a like-for-like basis. This growth was mainly explained by the strong performance of chemical waste treatment and incineration activities, as well as positive tariff adjustments that offset the negative impact of adverse weather conditions in the United States and Europe.

Energy revenue

Energy revenue was up +1.2% on a like-for-like basis and +4.1% excluding the impact of energy prices. The favorable climate impact of +2.4% and the commerce/volume effect of +1.3% enabled to largely offset the unfavourable energy price effect of -2.9%.

Revenue from the **stronghold District Heating and Cooling Networks**, mainly located in Central and Eastern Europe, rose by +4.4% on a like-for-like basis after neutralizing the impact of energy prices. This growth was driven by favorable weather conditions combined with good volumes, offsetting the negative impact of energy prices;

Revenue from **Bioenergies, Flexibility and Energy Efficiency booster** grew by +3.4% on a like-for-like basis and excluding the impact of energy prices. This development was mainly due to the strong performance in Northern Europe, which offset the decline in volume.

2.4 GROUP PERFORMANCE EVOLUTION BY EFFECT

2.4.1 Analysis of changes in Group revenues

Revenue was up +1.0% at constant scope and exchange rates, and +2.1% excluding energy prices. It breaks down as follows:

The **Foreign exchange impact** of -269 million euros (-2.3%) reflects the international dimension of the Group (approximately 60% of revenue in of non-euro revenue) and mainly corresponding to depreciation of US, UK, Argentinian, Japanese and Chinese currencies, partially offset by improvement in Czech and Hungarian currencies⁽¹⁾. It should be noted that these are translation impacts and not transaction impacts, with no effect on margins.

The **Scope effect** of +69 million euros (+0.6%) consists mainly of recent acquisitions in hazardous waste treatment in the US, in Japan, in Brazil and in Australia.

Commodities (corresponding to changes in energy and recycle prices) amount to -126 million euros (-1.1%), due to lower energy prices (-116 million euros), mainly in Central and Eastern Europe, as well as the negative effect of recycle prices, mainly paper and plastic (-10 million euros).

The **Climate impact** is +66 million euros (+0.6%), mainly in Energy in Central and Eastern Europe linked to a colder winter at the beginning of the year compared to 2025, partially impacted by a negative effect of adverse weather on Waste.

The **Pricing and Commerce** effect amounted to +180 million euros (+1.6%), with a sustained growth in Water and Energy, partially offset by lower Waste volumes ; as well as favorable tariff indexations and price increases in Water and Waste activities.

⁽¹⁾ Main foreign exchange impacts : US dollar (-123 million euros), British pound (-30 million euros), Argentinian peso (-23 million euros), Japanese yen (-21 million euros), Chinese yuan (-15 million euros), Czech koruna (+20 million euros) and Hungarian forint (+21 million euros).

2.4.2 Analysis of changes in Group EBITDA

The change in EBITDA between the first quarter of 2025 and 2026 breaks down as follows:

- **Foreign exchange** on EBITDA amounted to -€33 million (-2.0%). This mainly reflects the international dimension of the Group and mainly corresponds to the depreciation of US, British, Chinese, Japanese, Chilean and Argentinian currencies, partially offset by improvement in Czech and Hungarian currencies⁽¹⁾. It should be noted that these are translation impacts and not transaction impacts, with no impact on margins;
- **The scope effect** of +17 million euros (+1.0%) with notably recent acquisitions in hazardous waste treatment in the US, in Japan, in Brazil and in Australia;
- The change in **commodity prices** (energy and recycle) had a net unfavorable impact on EBITDA of -16 million euros (-0.9%), mainly due to lower energy prices (-18 million euros);

- **The weather impact** is favorable +16 million euros (+1.0%), mainly in Energy in Central and Eastern Europe, due to cold weather conditions until mid-March 2026, while the adverse weather negatively impacted Waste;
- **Growth and performance** of +87 million euros (+5.1%) thanks to **Pricing, Productivity and Efficiency** (net of gains shared with customers, contract renegotiations and timing effects on the passing on of costs) of 62 million euros (+3.6%). Water Technologies synergies amounted to 10 million euros at the end of Q1 2026. The Commerce/Volumes/Works contribution was limited due to decrease in Waste volumes in Q1.

Efficiency plan: €96 M

⁽¹⁾ Main foreign exchange impacts: US dollar (-12 million euros), British pound (-5 million euros), Chinese yuan (-4 million euros), Japanese yen (-3 million euros), Chilean peso (-3 million euros), Argentinian peso (-3 million euros), Czech koruna (+6 million euros) and Hungarian forint (+2 million euros)

2.5 OTHER INCOME STATEMENT ITEMS

2.5.1 Current EBIT

Group Current EBIT for the year ended March 31, 2026 is €971 million, up +7.2% at constant scope and exchange rates on the year ended March 31, 2025. EBITDA reconciles with Current EBIT as follows:

(€ million)	March 31, 2025	March 31, 2026
EBITDA	1,695	1,766
Renewal expenses	-74	-76
Amortizations ⁽¹⁾ , including repayment of operational financial assets	-750	-761
Provisions, capital gain or loss on disposals of fixed assets, and others	23	21
Share of current net income of joint ventures and associates	22	20
Current EBIT	915	971

The +€66 million (+7.2% at constant scope and exchange rates) increase in Current EBIT compared with figures of March 31, 2025 is mainly due to:

- a strong growth in EBITDA (+€87 million at constant scope and exchange rates);
- an increase in amortization⁽¹⁾, including principal payments on operating financial assets (-€18 million at constant scope and exchange rates);
- quasi-stable "provisions, capital gain or loss on disposals of fixed assets, and others" and "share of current net income of joint ventures and associates" items.

The impact of foreign exchange fluctuations on current EBIT is unfavorable at -18 million euros, mainly due to depreciation of US dollar, British pound, Chinese yuan and Argentinian peso for -3 million euros each, partially offset by favorable effects on Czech koruna (+4 million euros) and Hungarian forint (+3 million euros).

⁽¹⁾ Excluding the impact of the Suez purchase price allocation.

FINANCING

3 Financing

3.1 CHANGE IN FREE CASH FLOW AND NET FINANCIAL DEBT

Net free cash flow before financial investments and dividends was -€762 million as of March 31, 2026, versus -€906 million as of March 31, 2025.

The change in net free cash flow compared with March 31, 2025 reflects:

- the +€71 million increase in EBITDA, driven by organic activity growth and gains generated by operating and commercial efficiency plans;
- net industrial investments of -860 million euros, a decrease of +153 million euros compared to March 31, 2025. They notably include ongoing decarbonization projects in Central and Eastern Europe for an amount of 30 million euros, as well as investments in hazardous waste treatment projects for 10 million euros and PFAS (forever chemicals);
- the change in operating working capital requirement is -€1,200 million, compared with -€1,147 million in March 2025.

Net financial debt amounted to €20,797 million as of March 31, 2026, compared with €19,657 million as of December 31, 2025.

Compared with December 31, 2025, the change in net financial debt is mainly due to:

- net free cash flow of -€762 million;
- net financial investments of -€172 million primarily due to the acquisition of Enviropacific Services in Australia for -€137 million (see 1.2.2 Changes in Group structure).

Net financial debt was also impacted by foreign exchange gains and losses and fair value adjustments of -€99 million as of March 31, 2026, mainly as a result of variation in the dollar.

* Net financial debt excluding the impact of the remeasurement of debt as part of the Suez purchase price allocation, see Section 5.1.

4.1 OUTLOOK

2026 GUIDANCE AND GREENUP PLAN TRAJECTORY FULLY CONFIRMED

- Solid organic⁽¹⁾ revenue growth excl. energy prices;
- Organic⁽¹⁾ EBITDA growth of +5% to +6%;
- Current net income Group share⁽²⁾ growth of minimum +8% at constant forex and excl. Clean Earth;
- Current EPS Group share⁽²⁾ to grow in line with current net income Group share⁽²⁾ *(thanks to share buyback plan to compensate the impact of the employee shareholding program)*;
- Dividend growth in line with current EPS Group share growth⁽²⁾;
- Leverage ratio equal or below 3x excluding Clean Earth (equal or slightly above 3x with Clean Earth).

In addition,

- Assuming Clean Earth acquisition closing mid 2026, the transaction will be accretive to current net income from 2027 (before PPA) and synergies will start in 2027.
- The €2bn+ disposal program will be delivered in the two-years post closing of Clean Earth acquisition.

GreenUp trajectory is fully confirmed.

⁽¹⁾ At constant scope and forex.

⁽²⁾ Before PPA.

APPENDICES

5 Appendices

5.1 DEFINITIONS

No changes have been made to non-GAAP financial indicators used by the Group in the preparation of the financial statements as of March 31, 2026.

5.1.1 Non-Strictly accounting indicators (non GAAP)

The expression “**change at constant exchange rates**” represents the change resulting from the application of exchange rates of the prior period to the current period, all other things being equal.

EBITDA comprises the sum of all operating income and expenses received and paid (excluding restructuring costs, non-current working capital impairments, renewal expenses and share acquisition and disposal costs) and principal payments on operating financial assets.

The EBITDA margin is defined as the ratio of EBITDA to revenue.

To calculate **current EBIT** (which includes the share of current net income of joint ventures and associates), the following items are deducted from operating income:

- impairment of goodwill of controlled subsidiaries and equity-accounted entities;
- restructuring charges;
- non-current provisions and impairment;
- non-current and/or significant impairment of non-current assets (property, plant and equipment, intangible assets and operating financial assets);
- depreciation of remeasured assets in the context of the Suez purchase price allocation;
- share acquisition costs.

The cost of current net financial debt represents the cost of net financial debt, excluding the amortization of debt remeasured as part of the Suez purchase price allocation.

Net industrial investments, as presented in the statement of changes in net financial debt, include industrial investments (purchases of intangible assets and property, plant and equipment, and new operating financial assets), net of industrial asset divestitures.

The Group identifies three categories of investment:

- maintenance investments which reflect the replacement of equipment and installations used by the Group;
- growth investments which broadly correspond to investments included within our existing contracts or contractual requirements;
- discretionary growth investments which reflect investments in new equipment and installations linked to new projects, contract wins or significant new developments and extensions to existing projects or contracts.

The last two categories are defined as growth investments.

Net financial investments as presented in the statement of changes in net financial debt include financial investments, net of financial divestitures.

Financial investments include purchases of financial assets, including the net financial debt of companies entering the scope of consolidation, and partial purchases resulting from transactions with shareholders where there is no change in control.

Financial divestitures include disposals of financial assets including the net financial debt of companies leaving the scope of consolidation, and partial divestitures resulting from transactions with shareholders where there is no change in control, as well as issues of share capital by non-controlling interests.

Net free cash flow corresponds to free cash flow from continuing operations, and is equal to the sum of EBITDA, dividends received, changes in operating working capital and operating cash flow from financing activities, less net financial expenses, net industrial investments, taxes paid, renewal expenses, restructuring costs and other non-current expenses.

Net financial debt (NFD) represents gross financial debt (non-current borrowings, current borrowings, bank overdrafts and other cash position items) which includes IFRS 16 lease debt, net of cash and cash equivalents, liquid assets and financing-related assets, including fair value adjustments to derivatives hedging debt. Liquid assets are financial assets composed of funds or securities with an initial maturity of more than three months, easily convertible into cash, and managed with respect to a liquidity objective while maintaining a low capital risk. Net financial debt excludes the net impact of the remeasurement of debt in the context of the Suez purchase price allocation.

The leverage ratio (or financial leverage) is the ratio of closing net financial debt including IFRS 16 to EBITDA including IFRS 16.

The financing rate is defined as the ratio of the cost of net financial debt (excluding IFRS 16 lease debt and fair value adjustments to instruments not qualifying for hedge accounting) to average monthly net financial debt excluding IFRS 16 lease debt for the period, including the cost of net financial debt of discontinued operations.
